

Recreational Camping LDC Text Amendment

The purpose of this amendment is to revise Section 303 conditional use criteria for Recreational Camping. This category covers a lot of ground, from tent facilities to uses with RV Parking and Park Models.

Among the most basic of these uses – tent camping, for instance – some of the conditional criteria is too stringent. For example, recreational camping sites are to have access to Collector Roadways, but these are often not available in rural areas where camping is desired. Minimum upland area requirements are stringent for this use, too.

This amendment may also provide exemptions for private hunting, fishing, and other camps without permanent structures not open commercially to the general public.
