REVISED GRANT WORK PLAN**

PROJECT TITLE: Polk Regional Water Cooperative Heartland Headwaters Protection and Sustainability

PROJECT LOCATION: The Project will be located within the service areas of the Polk Regional Water Cooperative (PRWC) (Grantee). The PRWC is made up of Polk County and 15 municipalities. The County seat is located in Bartow, Florida; with an approximate Lat/Long of 27.8940, -81.8512.

PROJECT BACKGROUND: In 2017, the Florida Legislature passed HB 573, better known as the Heartland Headwaters Protection and Sustainability Act (Chapter No. 2017-111, Laws of Florida). The Act statutorily recognizes the vital importance of those portions of the Green Swamp Area of Critical State Concern that lie within the jurisdictional bounds of Polk and Lake counties and designates Polk County's aquifers as the headwaters for six of Florida's major rivers: the Alafia, Hillsborough, Kissimmee, Ocklawaha, Peace, and Withlacoochee Rivers. Furthermore, it acknowledges the critical importance of Polk County's aquifers to the economic and ecological health of the surrounding regions. The Act declared that fostering partnerships between Regional Water Supply Authorities (RWSA) and local governments is in the state's interest.

For the purposes of fostering such partnerships, the Act requires that the PRWC prepare annual comprehensive reports listing projects that are needed to protect and restore the region's water resources, so that they may be considered for state funding. These funds were awarded to PRWC (Grantee); the following entities will work in conjunction with the Grantee on this project: Polk City, City of Eagle Lake, City of Winter Haven, City of Frostproof, Polk County.

Project No. 1 - PRWC West Polk Wellfield Lower Floridan Aquifer Project

PROJECT BACKGROUND: In order to meet growing water demands, the PRWC determined that multiple projects would be required to meet future demands. The West Polk project, which would utilize the deep, lower Floridan, brackish aquifer as a source, would serve as one project which could help meet demands in western Polk County. Use of the lower Floridan as a water supply is thought to be protective of the region's sensitive natural resources.

PROJECT DESCRIPTION: The Grantee will complete a well testing program and designs for a reverse osmosis treatment facility and associated piping to serve numerous communities in western Polk County. This Project includes acquisition of land for the testing and the construction of the raw water wellfield. This project also includes acquisition of land for the water production facility, injection wells, and pipeline alignments. Legal fees may also be incurred as a part of this process.

The Grantee does not anticipate that the funding under this Agreement will result in a fully completed project, so this Agreement will cover a portion of the work.

Project No. 2 Eagle Lake Wastewater Pump Station Replacement Project

PROJECT BACKGROUND: Lake McLeod and Eagle Lake exist within the Peace Creek Watershed, in which there is a TMDL for fecal coliform. The City of Eagle Lake plans to replace two wastewater pumping stations to prevent failures which have the potential to overflow sewage into the lakes.

PROJECT DESCRIPTION: The Grantee will complete the construction plan revision, bid document revisions, bidding and contractor selection, and the construction of two wastewater pumping stations and installation of emergency generators to replace aging existing pumping stations, one located at a park near Eagle Lake and one located in a low elevation area adjacent to Lake McLeod.

Project No. 3 - Winter Haven Septic to Sewer Program

PROJECT BACKGROUND: Nearly half of the 50 lakes in Winter Haven are on the impaired list for water quality due in part to septic tank loading. The City of Winter Haven serves a population of approximately 74,675, which includes 14,070 residences that are on septic systems. This project will design, permit and construct the first remediation area from the priority list identified in the Septic to Sewer Master Plan completed in January 2021. The Septic to Sewer Master Plan prioritizes and will subsequently eliminate some of the septic tank discharges by converting septic tanks to central sewer in a very high recharge area. The City of Winter Haven has completed a Septic to Sewer Master Plan in January 2021 which recommends priority areas for the conversion to sewer.

PROJECT DESCRIPTION: The Grantee will complete the design, permitting, and bidding services for a new public collection system, as well as on-site private septic system evaluations, connections to the new collection system, and septic tank decommissioning for approximately 125 residential and commercial accounts around East Lake Hartridge and US 17. They will also complete the construction of the collection system within the right-of-way in Remediation Area 6A and Boggy Bottom Area.

The Grantee does not anticipate that the funding under this Agreement will result in a fully completed project, so this Agreement will cover a portion of the work.

Project No. 4 - Frostproof Wastewater System Upgrades

PROJECT BACKGROUND: The City of Frostproof has prepared 90% design plans and technical specifications for the planned construction of a pretreatment/headworks system at its wastewater treatment plant. The City is also in the process of designing the expansion of its rapid infiltration basin (RIB) system for effluent disposal.

PROJECT DESCRIPTION: The Grantee will complete the design and construction of all components for the headworks, including the control panel, screen, compactor, grit system, stairs/walkway sensor, delivery, startup, training, permitting, and construction administration, as well as the design and construction of a rapid infiltration basin expansion and emergency generators for the lift station.

The Grantee does not anticipate that the funding under this Agreement will result in a fully completed project, so this Agreement will cover a portion of the work.

Project No. 5 - Winter Haven ASR Wellfield

PROJECT BACKGROUND: The Winter Haven area is the headwaters for the Peace River which flows to Charlotte Harbor. This project is part of a larger One Water Master Plan to create green infrastructure projects, which provide water supply, water quality, flooding and natural system restoration. This project involves the design and construction of an aquifer storage and recovery (ASR) wellfield which would take excess surface water flow during flood events, store it in the lower Floridan aquifer, and then recover the water during drought events.

PROJECT DESCRIPTION: The Grantee will complete the design and construction of a roughly 1.5 MGD ASR well system to store excess water from the Peace Creek System for beneficial use, including a report on the Flow and Water Quality Data Summary and Analysis of available water sources and quantities and characterize water quality to determine treatment requirements, local hydrogeology, area features, and regulatory reviews, and well options screening evaluations.

The Grantee does not anticipate that the funding under this Agreement will result in a fully completed project, so this Agreement will cover a portion of the work.

Project No. 6 - Polk County AWS Receiving Facilities

PROJECT BACKGROUND: Polk County is a member of the PRWC and will receive regional alternative water supplies from the PRWC via the Southeast Wellfield Project. Polk County must design and construct a receiving station to facilitate the re-pumping to an AWS system in its Northeast Regional Utility Service Area (NERUSA).

PROJECT DESCRIPTION: The Grantee will complete the design of an alternative water supply storage and repump facility. The station will include an approximately 1 MGD storage tank, pumps, chemical feed, electrical equipment, generator, and associated equipment. This project includes land acquisition, designs, and permitting for the new facility.

The Grantee does not anticipate that the funding under this Agreement will result in a fully completed project, so this Agreement will cover a portion of the work.

Project No. 7 - Southeast Wellfield Lower Floridian Aquifer Project

PROJECT BACKGROUND: The Polk Regional Water Cooperative (PRWC) exists within the Central Florida Water Initiative area, a region of Florida identified as being limited in traditional water supply. This project is intended to help meet growing demands by utilizing the deep, lower Floridian, brackish aquifer as a source. Use of the lower Floridian as a water supply is thought to be protective of the region's sensitive natural resources.

PROJECT DESCRIPTION: The Grantee will acquire property or right of way for a 15 MGD reverse osmosis treatment facility, approximately 66 miles of transmission piping, and approximately 10 miles of raw water main and associated raw water wells. Legal fees may also be incurred as a part of this process.

TASKS: All documentation will be submitted electronically unless otherwise indicated.

Task 1: Land Acquisition

Deliverables: The Grantee will acquire fee simple or less-than-fee simple interest on properties within the service areas of the PRWC. Costs related to pre-acquisition and acquisition will be reimbursable. The property interests will be held by Polk County, to be transferred by the Grantee after the acquisition is complete. The Grantee will complete the following:

- **Project 1:** Land acquisition of the raw water wells, wastewater plant, and pipeline for a 2.5 MGD facility.

(NOTE: This part would be used to specify any additional audit requirements imposed by the State awarding entity that are solely a matter of that State awarding entity's policy (i.e., the audit is not required by Federal or State laws and is not in conflict with other Federal or State audit requirements). Pursuant to Section 215.97(8), Florida Statutes, State agencies may conduct or arrange for audits of State financial assistance that are in addition to audits conducted in accordance with Section 215.97, Florida Statutes. In such an event, the State awarding agency must arrange for funding the full cost of such additional audits.)
